

Velo Data

A speed-first UI for digital assets market data

Market

- One of the few sectors in crypto with proven monthly revenues and multi-cycle staying power is paid analytics/data
- Existing services are slow, not run by actual traders, and too specific - users need multiple subscriptions to see everything they want
- Still no replacement for Skew after they were acquired for \$65mn and essentially sunset

Features

- Everything useful that competitors have and way more - a few examples:
 - Futures OI profile and OI-weighted average price
 - Aggregated measures for custom and predefined coin baskets
 - DEX trading suite
 - Total return charts (simulated funding payments)
 - Telegram, Twitter, and Discord bots
 - The perfect crypto VIX
 - Return by market session charts
 - NFT meta-analyses and order book visualizations
 - Tables and market breadth gauges for a top-down altcoin view
