

A speed-first UI for digital assets market data

hello@velodata.app

Analytics provision has shown some of the best revenue and multi-cycle staying power in crypto.

And when Skew was acquired for \$65m then essentially sunset - **no one stepped up to fill the gap they left.**

**Available services are slow,
unimaginative, not run by actual
traders...**

**Plus users need multiple
subscriptions to see everything
they want.**

This is where Velo comes in.

Traders shouldn't have to choose between juggling multiple subscriptions or learning how to code.

What if there doesn't need to be a tradeoff between flexibility and usability?

- ✓ Mobile friendly, lightning fast
- ✓ A focus on what's relevant
- ✓ Twitter-centric marketing
- ✓ Distinct original visuals

Velo lets users take analysis a step further.

**We doesn't just feed data back from
exchange APIs - we answers questions.**

Open Interest Indexed To 100

FTM ONE

velodata.app

2023 Total Market Median Return By Hour

And if we miss something - power users can add it themselves in our codeless terminal.

=SUM(BTC.OPTS.CALL_VOLUME - BTC.OPTS.PUT_VOLUME, 20)

BTC Rolling 20 Day Call-Put Volume (Contracts)

velodata.app

Beta

- Derivatives-first approach
- Prioritize usefulness
- Invite codes

Q2 Release

- Bulletproof software
- Marketing push
- Apply feedback

Dominance

- Revenue growth
- Institutional tier
- **Spot, on-chain, and NFT rollout**
